

Молекуларни маркери у утврђивању родитељства, педигреа и карактеризацији врста и раса животиња (1+2)

Планирано је да студенти ДАС кроз конкретне примере наших истраживања (списак испод) савладају методологију тестирања родитељства, анализе сродства и педигреа и карактеризације врста и раса животиња применом молекуларних маркера (почев од узорковања материјала до анализе података); разумеју значај тестирања родитељства, верификације педигреа и карактеризације врста и раса у програмима гајења и селекције животиња и упознају се са факторима који утичу на сензитивност и прецизност коришћених тестова.
